## Work Package 3. Definition of common standards, protocols and ontology

Work Package 3 will analyze and standardize the way experiments are carried out through a common ontology of traits, environment and measurement methods, and establish procedures for common data management. It will aim at improving knowledge of practices between partners, and at spreading best practices among the network. It will feed description of methods to WP2.

Work Package 3 objectives are to:

- ❖ Develop an ontology for fish traits, measure methods and environmental conditions.
- ❖ Harmonize and standardize phenotypic and experimental conditions.
- ❖ Construction of an experimental data repository.
- ❖ Define sanitary standards for the transfer of fish or germplasm.
